- Cardboard
- Paper
- Aluminum cans
- Steel cans
- Glass bottles & jars

## Congratulations to:

Keller Market House is a nonprofit marketplace, a micro-business incubation center and a community gathering space where locally grown and produced foods and products may be prepared, aggregated and sold.

Keller Market House cares about the environment by advocating the reuse of egg cartons and glass containers. By selling milk, jams and jellies in glass containers, customers are able to bring them back to be reused again to help cut down on wasteful habits. There's even a return deposit on the glass milk jugs! This business also recycles all cardboard and plastic waste materials, and takes them to local drop off sites on an as-needed basis. Thank you Keller Market House for your dedication to reducing waste in our local landfills!

The North End Press Incorporated located at 235 South Columbus Street in Lancaster has been in the printing and bindery industry since 1933. This industry fosters all aspects of reducing, reusing and recycling in their offices as well as their printing rooms daily. They began recycling paper in the early 1980's, by the 1990's were recycling plastic, cardboard and all used scrap metals. They recycle all used paper by marketing them out to their own buyers, and also reuse their plastic wrapping from skids for new shipment packing, and even market all of their used scrap metals to buyers as well! All other shredded/mulched paper even goes to local friends and farmers for livestock bedding! This industry only uses a 2 yard dumpster for all non recyclables, and produces less than 100 gallons of garbage per week! For a 55,000 square foot building, that's AMAZING! This industry has led by example and has truly adopted a greener way of life by reducing nearly all wasteful habits. Your industry can too!
